

1. Introduction

- Keywords & Identifier
- Statements & Comments
- Python Data types
- Python I/O and Import
- Python Operators
- Operator Precedence

2. Flow Control

- Python if...else
- Python for Loop
- While Loop
- Break and Continue
- Pass Statement
- Looping Technique

3. Native Data Types

- Python Numbers
- Python List
- Python Tuple
- Python String
- Python Set
- Python Dictionary

4. Functions

- Python Function
- Function Argument
- Python Recursion
- Anonymous Function
- Python Modules
- Python Package

5. File Handling and Exception Handling

- File Operation
- Python Directory
- Python Exception
- Exception Handling
- User-defined Exception

6. OOPS

- Class
- Object
- Encapsulation
- Data Hiding
- Inheritance
- Polymorphism

7. Python CGI Programming

- Get Method
- Post Method
- Passing Checkbox Data
- Passing Radio Button Data
- Passing Text Area
- Passing Drop Down Data
- File Uploading Using CGI

8. Python MySQL Database Access

- Create Table
- Insert Table
- Select Table
- Update Table
- Delete Table
